Supplementary Figure 11

Gene expression

**EZH2**
Wald test, p adj = 7.39e-07

**SUZ12**
Wald test, p adj ns

**EED**
Wald test, p adj 0.022
Supplementary Figure 11. Gene expression of components of the PRC2 complex. Mean expression (log$_2$-transformed normalized counts per million, EdgeR) per patient of EZH2 (p adj <0.05), SUZ12 (not significant) and EED (p adj < 0.05) grouped for patients with TAL-rearrangements (representative for COSMe Type I) or without (representative for COSMe Type II). Data from GSE110637.
